Amina-Kamra Maglić

UX Researcher, Product & Service Designer

maglickamra@gmail.com | +387 62 579 681 | maglickamra.site

PROFILE

UX researcher, product and service designer who takes work from research to a working, testable product. ABB digital twin research and prototype led to a multi-year R&D project; built and launched FridgePeek end to end. MSc Interactive Media Technology (KTH), BA (Hons) Interaction Design (Glasgow School of Art).

EXPERIENCE

Design Consultant, Gracija Magazine, Sarajevo, BiH — Nov 2023 – present

- Plan annual humanitarian galas for victims of domestic violence (450 attendees, about €20k raised each year): sponsors, funding, ideation, logistics. Design each event's visual identity.

UX Researcher, ABB, Västerås, Sweden — Jan 2026 – Jun 2026

- Digital twin research for industrial switchgear commissioning, hosted by the ABB UX team. Findings and prototype led ABB to launch a multi-year R&D project.
- Interviewed engineers, sales specialists and commissioning technicians (4). Synthesised through affinity diagramming in Figma and 2 journey maps into 5 themes and 6 design requirements.
- Ran an ideation workshop with the ABB UX team, then built a medium-fidelity interactive prototype with Lovable and Claude over two iterations.
- Tested with think-aloud sessions, post-task interviews and SUS (mean 76.7, rated "good"); 3 design recommendations. Research-based accessibility decisions; GDPR-compliant data handling.

Teaching Assistant, KTH Royal Institute of Technology, Stockholm, Sweden — Dec 2025 – Mar 2026

- Graded assignments and supported students in exercises and consultations for Human-Computer Interaction and Introduction to Visualization, Computer Graphics and Image/Video Processing.

Web Developer & Data Analyst, SKRIPTA, Sarajevo, BiH — Jun 2022 – Jul 2025

- Built websites from scratch for EU and other foreign-funded projects (PHP, MySQL, JavaScript).
- Built a web scraper with Codex to collect and analyse data for a research project run in collaboration with Harvard.

Creative Technologist, Glasgow School of Art, Glasgow, UK — Dec 2022 – Feb 2023

- Projection mapping, motion graphics, interactive systems, 3D modelling and museum curation for exhibitions.

Design Intern, Represent Communications Bosnia and Herzegovina, Sarajevo, BiH — Jun 2020 – Sept 2021

- Client management, graphic design, branding, advertising, video and motion graphics; managed the agency e-commerce site.

SELECTED PROJECTS

- **FridgePeek (Oct 2026).** Designed and developed a live grocery price-tracking app (fridgepeek.lovable.app), accepted into SheBuilds by Lovable. Defined the concept and MVP, created the Peeky mascot and brand kit, and built the frontend in React.
- **Furhat Face and Loneliness Study (KTH, 2025, team of 4).** Between-subjects study of 14 students (7 per condition) on how realistic vs cartoonish robot faces affect loneliness. UCLA-8 pre/post, interaction logs, Wilcoxon signed-rank tests, thematic analysis of interviews.
- **Journey (KTH, 2025, team of 5).** Flight and destination finder for international friend groups, where passports, not price, decide where you can go together: parallel-coordinates flight filter, visa globe, trip detail view. Worked on research methods and the frontend (React, D3.js, MaterialUI).
- **Interactive AR Digital Bulletin Board (KTH, 2024, team of 4).** AR cultural posters in Unity and Vuforia with visual, audio and haptic feedback. Handled research methods: study of 10 participants comparing AR and printed posters (SUS 74.3 vs 73.2, preference scale).
- **Human Perception for Information Technology (KTH, 2024).** Led a 40-participant study of music-colour associations (Coltrane excerpts): design, recruitment, sessions, chi-square analysis in Python. First author of the paper.

EDUCATION

MSc, Computer Science and Electrical Engineering (Interactive Media Technology), KTH, Stockholm — Aug 2024 – Jun 2026

BA (Hons), Interaction Design, University of Glasgow, Glasgow School of Art — Sept 2020 – Jul 2024

SKILLS

Design & prototyping: Figma (wireframes, UI design, design systems, interactive prototypes), interaction design, accessibility (WCAG), paper prototyping, Google Analytics, Photoshop, Illustrator, InDesign

Research methods: Interviews, ideation workshops, affinity diagramming, journey mapping, think-aloud usability testing, SUS, thematic analysis, controlled experiments, survey design, A/B testing, chi-square analysis

AI-augmented work: Claude, Codex, GitHub Copilot, Lovable for rapid prototyping; ChatGPT for research synthesis; Runway and Midjourney for AI video and film

Development: Python, JavaScript, React, D3.js, HTML, CSS, PHP, MySQL, Git

Ways of working: Scrum, project management, team leadership, client management, SEO

Languages: Bosnian/Croatian (native), strong English and German

Citizen of Bosnia and Herzegovina. Work permit and employer sponsorship required.
