PROFILE

UX and service designer with a design-engineering edge, pairing human-centred research and interaction design with AI-augmented development to take work from insight to a working, testable prototype rather than a static mock-up. Comfortable across the full arc from research and systems thinking to hands-on build, using AI coding assistants (Claude, Codex, GitHub Copilot) alongside traditional design and 3D tools.

WORK EXPERIENCE

UX Researcher — ABB Jan 2026 – Jun 2026
Västerås, Sweden

- Researched digital twins in safety-critical industrial environments, focused on operator decision-making and data visualisation.
- Used vibe coding and Claude to build a working prototype of the digital twin interface directly from research findings, moving from concept to a testable build faster than a mock-up-only workflow.

Teaching Assistant — KTH Royal Institute of Technology Dec 2025 – Mar 2026
Stockholm, Sweden

- Graded assignments and supported students during course exercises and consultations.

Web Developer & Data Analyst — SKRIPTA Jun 2022 – Jul 2025
Sarajevo, BiH

- Web development on WordPress: custom theme and plugin creation and modification, WooCommerce.
- Built a web scraper with Codex to collect and analyse data for a research project run in collaboration with Harvard.

Creative Technologist — Glasgow School of Art Dec 2022 – Feb 2023
Glasgow, UK

- Projection mapping and motion graphic design for exhibitions.
- Technical implementation of interactive systems, 3D modelling and museum curation.

Design Intern — Represent Communications Bosnia and Herzegovina Jun 2020 – Sept 2021
Sarajevo, BiH

- Client management, graphic design, video production, branding and advertisement design, motion graphics design.

EDUCATION

MSc, Computer Science and Electrical Engineering — KTH Royal Institute of Technology Aug 2024 – Jun 2026
Stockholm, Sweden — Specialisation in Interactive Media Technology

BA (Hons), Interaction Design — University of Glasgow, Glasgow School of Art Sept 2020 – Jul 2024
Glasgow, UK

SKILLS

AI-augmented design & development: Hands-on with Claude, Codex and GitHub Copilot for AI-assisted development and rapid prototyping ("vibe coding"); ChatGPT for research synthesis and design critique; building working prototypes straight from AI-generated code, most recently ABB's digital twin interface and the "Journey" project in her portfolio.

Web development: Advanced WordPress; PHP, MySQL, JavaScript; creating and modifying WordPress themes and plugins; WooCommerce; independent, self-directed delivery.

Programming & prototyping: Python, Java, JavaScript, HTML, CSS, C#; Arduino workflows.

3D & motion: Blender, Maya, Unity; motion graphics design and video editing.

Creative & productivity tools: Adobe Suite (extensive); MS Office (extensive).

Digital & content: Social media communication and marketing; SEO optimisation and Google Analytics; digital content creation.

Professional: Team leadership and project management; communication in crisis-management situations; experienced working across diverse, large-group environments.

Languages: Strong English and German language proficiency.

CERTIFICATIONS

Creative Coding: Making Visuals with JavaScript — Domestika, Oct 2023 (JavaScript, HTML, CSS, Node.js)

London School of Public Relations Content Academy — Sarajevo, Sept 2019 – Jan 2020 (SEO optimisation, Google Analytics, digital content creation, social network management)

Al Jazeera Balkans Videography Seminar — Sarajevo, Sept 2019 – Oct 2019 (Filmmaking, Adobe Premiere Pro, Adobe After Effects)
